### PAPERCLIP BRACELET

#### How to make a paperclip bracelet

1. Straighten out your paperclips
2. Wrap them around a pencil so that they resemble a coil
3. Slide the coiled paperclips off the pencil
4. Loop the coils of paperclips together (see picture)
5. Continue until the bracelet is large enough to fit over your wrist

Use a loosely coiled paperclip to fasten the ends together (see white paperclip in the picture)

For an easier version, just loop paperclips together....double them up as you go to create some interesting color variations.
