WINTER DEEDLE-BUGS

All supplies included except for scissors and glue):

1. Cut a heart shape out of the foam. The heart shape should be slightly larger than the diameter of the large pompom. (the heart will become the feet of the deedle-bug)
2. Cut a scarf shape from the construction paper (fringe the ends a bit) Glue this scarf onto the heart shape so it hangs off the edge quite a bit.
3. Glue the large pompom to the top of the scarf/heart shape.
4. Glue the eyes and nose, mini pompoms, onto the large pompom to create the face.
5. Bend the pipe cleaner in half and glue into the top of the large pompom for antennae. Your deedle bug is done! Repeat the above steps for the other two deedle-bugs.
