

## Felt Covered Coaster Instructions

**Items you are given:** 13 craft sticks, square of felt (colors will vary)

**Items you will need:** glue

**Step 1:** Line up 11 of the craft sticks side by side (so the long edges are touching). Make sure all the ends are even.

**Step 2:** Put glue on the entire length of the two remaining craft sticks and glue them to the top and bottom ends of the sticks you just lined up. Be sure that the glue covered sticks cross over all 11 of the lined up ones from Step 1.

**Step 3:** Once the glue is dry, turn your coaster over and glue the colored felt square to it. It should just about cover the whole thing.

You are done! Make sure you wait for everything to dry completely before using your coaster. Enjoy!
