PUZZLE PICTURE FRAME

Basic Supplies Needed: Popsicle sticks (4) and puzzle pieces (about 35)

Additional supplies you will need: Glue (Elmer's or tacky, *not a glue stick*) and Tape

1. Glue the 4 Popsicle sticks together at the ends to form a square. Let dry. (it is important you let the frame dry, as you will be building on this)
2. Run a line of glue along the Popsicle sticks and randomly put down puzzle pieces. Make sure that they touch the glue. Let dry for a little bit.
3. Add a second (and third if you want) layer of puzzle pieces, overlapping the previous layer you glued down.
4. When you have all your layers finished and things are completely dry, glue (or tape) the string to the back of the frame at the top. Let dry completely before attempting to hang.
5. Add a photo or picture to the back, so it shows through the front of your puzzle frame. You can use tape to secure the picture/photo.
