

## Instructions for Hedgehog Clip

**Supplies you are given:** 1 piece light brown paper, 1 piece dark brown paper, 1 piece black paper, 2 google eyes, 1 clothespin

**Supplies you will need:** Scissors, glue stick

Step1: Apply glue to one short end of the light brown paper. Bend the other end of the paper over and glue the two ends together and press firmly so they stick. You will get a teardrop shape when they are glued together. While the glue is drying go to step 2.

Step 2: Cut elongated diamond shapes from the dark brown paper. You will need about 20 of them. These will be the spikes for the hedgehog.

Step 3: Now that the teardrop shape in step 1 is dry, cut the glued end to create a face shape. It can be rounded or pointy.

Step 4: Glue the diamond shaped spikes onto the body. Glue only one end so that the other end sticks up to create a spiky look. Glue them all over the teardrop shape, leaving the face plain.

Step 5: Cut out a nose from the black paper, glue it to the face, then add the google eyes. Let your hedgehog dry completely before gluing the clothespin to the bottom. You are all done!!
