

Beaded Paperclip Bookmark Instructions

Items you are given: 1 large paperclip, a length of string, several beads (shapes, colors and sizes vary)

Items you will need: scissors and school glue (optional)

Step 1: securely knot your string to the single loop end of the paperclip. If you wish, you can add a drop of glue to keep the knot secure. If you do decide to add glue, let the glue dry before adding your beads.

Step 2: time to add your beads. Before you string them, decide on a pattern, or, if you wish make it totally random.

Step 3: Once you have your beads strung, tightly knot the end of the string around the last bead (again, add some glue to the knot if you want it to be super-duper secure)

Once your beaded paperclip bookmark is done, you can clip it onto a book page to hold your place.
