

Craft Stick Photo Frame Instructions

Items you are given: 8 craft sticks, 1 pipe cleaner, flower and bird stickers

Items you will need: white glue and a photo* (you can also use a picture you have drawn or even something you have written) for the frame *(Make sure the photo is not too large since you will be building the frame around it.)

Step 1: Glue two craft sticks to the top and bottom (on the BACK) of your photo. Make sure to center the photo. Then, glue two more sticks (on the FRONT) overlapping the two you just placed so your photo is sandwiched in the center of the sticks. Be sure to line them up with the ones on the back of the photo.

Step 2: Take the last four sticks and glue two to the left of the picture and two to the right, like pickets of a fence.

Step 3: Let things dry for a bit (until the glue is just set) before you add your stickers. You don't want things to shift as you are applying them. Once you have all the stickers on, let your frame dry completely.

Step 4: Once things are completely dry, attach the pipe cleaner to the top to create a hanger. You can weave the ends of the pipe cleaner through the openings of the craft sticks to secure it.
