

Alligator Pencil Caddy

Items you will need: Scissors, construction paper (preferably green or brown, but any color will work), white paper, markers, glue, pencil, paper towel rolls or toilet paper rolls

Optional items: Paint and paintbrush, wiggle eyes

Step 1: Cut paper towel roll into thirds (if using toilet paper rolls, no need to cut them)

Step 2: Cover rolls with paint (**OPTIONAL**) and let dry. Give them 2 coats. You can leave the rolls brown if you want.

Step 3: Glue the rolls together in a straight line.

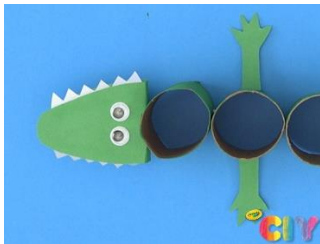

Step 4: Sketch and cut out head, legs and tail, glue to rolls. Let dry!

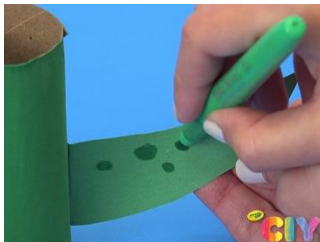

Step 5: Sketch and cut out teeth and glue to the inside of the mouth.

Step 6: Using markers, add eyes to the head. If you have wiggle eyes, glue those on instead of drawing them in with a marker.

Step 7: Add details to the face, legs and tail using markers

Step 8: Add supplies to organize your desk. Be aware....the rolls have no bottom so moving your holder around will be difficult. Glue more construction paper to the bottom of the rolls if you want to be able to move it around.
