

Flower Pot Gnome Instructions

Items you are given: 1 wide craft stick, 1 thin craft stick, 1 piece of felt, 1 piece of cardstock paper, a cotton ball, several seed beads

Items you will need: Glue, scissors, pen (or marker)

Step 1: Glue the cardstock paper about 3 inches from one end of the wide craft stick (it doesn't have to be exact), this will be the gnome's coat.

Step 2: Cut a shape out of the felt, this will be the gnome's hat. Decorate the hat any way you want to with some of the seed beads and cotton.

Step 3: Once dry, cut off the excess cardstock paper so it is even with the craft stick and nothing hangs over the edges or bottom.

Step 4: Glue on the decorated felt hat at the other end of the craft stick.

Step 5: Shape the cotton piece to look like a beard (be creative... make it full and fluffy, or long and thin....you can even take a tiny piece and make a moustache, or eyebrows) Once you have things all shaped out, glue on the beard and any other pieces of facial hair.

Step 6: Using a pen or marker, add eyes and any other facial features. Glue some seed beads onto the coat for decorations or buttons.

Step 7: Once things are all completely dry, glue the thin craft stick to the bottom of the wide craft stick so part of it hangs off the bottom of the wide stick. You will use this thin stick end to put your gnome into a flower pot.
