

## **Toilet Paper Roll Birdfeeders**

source: <https://www.theresourcefulmama.com/toilet-paper-roll-bird-feeders/>

**Items you will need:** Peanut Butter, Plastic Knife, Bird Seed\*\*, Toilet Paper Rolls, Twine (or string)

\*\* If you do not have birdseed on hand, you can also use cracker crumbs, cereal, dried bread crumbs or shelled nuts (unsalted)

**Step 1:** Using the plastic knife, cover the outside of the toilet paper roll with peanut butter. Make the layer of peanut butter somewhat thick so it can hold the birdseed.

**Step 2:** Roll the peanut butter coated toilet paper tube in birdseed until it is completely covered.

**Step 3:** Thread a piece of twine (or string) through the toilet paper tube and then knot the ends together. Make sure your twine is long enough because once knotted, you will hang the finished feeder from a branch using the loop the knotted twine creates.

**Step 4:** Hang where birds can enjoy.
