

## **Apple Core Craft Instructions**

**Items you are given:** 3 large craft sticks, 2 small craft sticks, 2 pieces of red paper, 1 piece each of green and black paper, 1 length of string

**Items you will need:** scissors, glue, black or brown marker or crayon

### **Step 1:**

Lay the large craft sticks side by side and glue the small ones across the top and bottom ends. Once it is dry, **turn the sticks over**. The small craft sticks will hold the large sticks together.

### **Step 2:**

Cut two scalloped-edge, semi-circles from the red papers. Glue a semi-circle at the **front** top and **front** bottom of the craft stick assembly. These will be the top and bottom of the apple core.

### **Step 3:**

Cut out a leaf shape and a stem shape from the green and black paper. Glue them to the front top of the apple core assembly.

**Step 4:** Using a black/brown marker/crayon, draw on seed shapes to the middle of the apple core.

**Step 5:** Use the piece of string to make a hanger for the back of your project. You can also make it a magnet (magnet not included)
