

Instructions for Hedgehog Clip

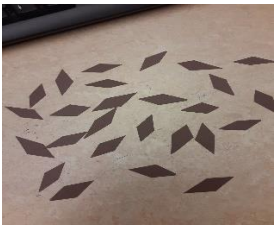

Supplies you are given: 1 piece light brown paper, 1 piece dark brown paper, 1 piece black paper, 2 googly eyes, 1 clothespin

Supplies you will need: Scissors, glue stick

Step 1: Apply glue to one short end of the light brown paper. **BEND** (not fold) the other end of the paper over and glue the two ends together and press firmly so they stick. Once dry, trim the short end that you just glued to look like a hedgehog snout.

Step 2: Cut elongated diamond shapes from the dark brown paper. You will need about 25 of them. These will be the spikes for the hedgehog.

Step 3: Glue the diamond shaped spikes onto the body. Glue only one end so that the other end sticks up to create a spiky look. You can also bend them a bit before you glue them on, so they look even spikier. Glue them all over the hedgehog shape, leaving the face area plain.

Step 4: Cut out a nose from the black paper, glue it to the face, then add the googly eyes. Let your hedgehog dry completely before gluing the clothespin to the bottom. You are all done!!
