

## Holiday Pony Bead Wreath

**Items you are given:** Assortment of red/white/green pony beads, One green pipe cleaner, One red bow

**Items you will need:** Glue

**Step 1:** Thread the pony beads onto your green pipe cleaner. You can make a pattern, or just make it random. Leave about 2 inches of non-beaded pipe cleaner on each end. You will use these non-beaded sections to finish off your wreath.

**Step 2:** Once you have the beads on the pipe cleaner, twist the non-beaded sections together so that your finished piece is a circle shape. Then, again taking the non-beaded sections, twist them together and make a hook. You will use this as a hanger.

**Step 3:** Glue the red bow to the top of your wreath. Allow your wreath to dry completely before hanging.
