

Flower Doorknob Hanger

Items you are given: 4 large craft sticks, 2 small craft sticks, 1 pipe cleaner, 1 fabric flower, 1 leaf, 1 piece of green paper

Items you will need: Scissors, white glue, tape (optional)

Step 1: Lay the large craft sticks side by side so you end up with a rectangle shape.

Step 2: Put glue on the two small craft sticks and lay them across the large craft sticks (Make sure you lay them across all 4 large sticks.) Let the glue dry thoroughly. Once dry, the small craft sticks will hold the large ones in place. This will be the back of your doorknob hanger craft.

Step 3: Either glue or tape (optional) the pipe cleaner to the top of the large craft sticks. This will be the hanger that goes over your doorknob. You are still working on the back side of the craft. Once the glue for the hanger is dry (or once the pipe cleaner is taped on) you can flip the whole assembly over to work on the front.

Step 4: Cut out a stem shape from the green paper and glue it onto the front of the craft.

Step 5: Glue the flower to the top of the stem.

Step 6: Cut off, or bend back, the wire on the leaf and then glue the leaf to the bottom of the flower stem.

Step 7: Wait for all the glue to dry completely before hanging the craft on a doorknob.
